Instructions for making a blog post from my video:

- 1.) I will Make a Video
- 2.) You Transcribe it or go into the Youtube creator studio and download the transcription. I can make a video for you if you don't already know how to do this. Then make a new blog post on my web site and paste in the transcription.
- 3.) Put the video on the blog

- 4.) Add a Call to Action Button for lead generation
- 5.) Add an infographic or any other photos/pictures
- 6.) Clean up the transcription so it reads more like an article. Optimize it.
- 7.) Include internal links to other key pages on your website
- 8.) Include external links that the user would find valuable.
- 9.) Include related articles
- 10.) Create a compelling excerpt and meta description
- 11.) Add to appropriate category
- 12.) Add a Featured Image

Instructions for new leads:

When I get a lead I will email you all the information I have and any notes I take from the conversation. Please enter them into LionDesk and assign a type (buyer, seller, buyer AND seller, renter) and then tags (military, first time buyer, etc.)

If they are a "moving to Savannah" lead I want to put them on the monthly "moving to Savannah mail chimp" email campaign.

Are you familiar with Liondesk already or do I need to give you more instructions?
